

VRANCH SINHA

Product Designer · UI/UX Designer
+91-9336771392 · vbranchsinha@gmail.com

Product Designer with 3+ years of freelance experience crafting intuitive, scalable, and high-impact digital products across healthcare, fintech, SaaS, and consumer sectors. Combines strong product thinking with hands-on expertise in user research, user flows, wireframing, prototyping, and design systems to deliver seamless user experiences.

Proven track record of improving usability and driving user engagement by 20–30% through data-informed and user-centric design decisions. Experienced in working closely with founders, developers, and cross-functional teams in fast-paced startup environments, while independently owning end-to-end design strategy and execution.

COMPETENCE SKILL SET

Design Tools: Figma, FigJam, Spline, Illustrator, Wireframing, Prototyping, Design Systems, User Flows, UI/UX Design, Visual Design, Branding

Soft Skills: Interaction Design, Typography, UX Research, Problem Solving, Stakeholder Management, Collaboration

CAPSTONE PROJECT

Product Designer (UI/UX + Branding) | Genesis – Gen AI Platform for Content Creators |

- Owned end-to-end product design for a Gen AI platform, leading branding, logo design, and web app UI/UX, and establishing a scalable, user-centric product foundation.
- Designed user journeys, information architecture, and high-fidelity interfaces to streamline content creation workflows, reducing cognitive load and improving task efficiency.
- Collaborated cross-functionally with an influencer (user insight) and engineering team, translating product vision into intuitive, data-informed design solutions aligned with creator needs.
- Redesigned and optimised the user onboarding experience, simplifying navigation, reducing drop-offs, and accelerating time-to-value for new users.
- Built a modular design system, enabling consistent UI patterns and improving design-to-development efficiency across iterations.

Key Product & UX Outcomes

- User Growth:** Scaled platform from 200 to 10,000+ users within 30 days (50x growth), driven by design-led improvements in onboarding and usability.
- User Activation:** Improved onboarding completion rates by 35–45%, reducing early-stage drop-offs and increasing first-time user success.
- Engagement:** Increased average session interaction and feature usage by 25–30% through intuitive navigation and streamlined workflows.
- Time-to-Value:** Reduced time for users to create first output by 30–40%, enhancing product stickiness.
- Design Efficiency:** Enabled faster iteration cycles (20–25% improvement) through implementation of a scalable design system and reusable components.

PROFESSIONAL EXPERIENCE

Product & UI/UX Designer | Freelance | 2023 – Present

- End-to-End Product Design & Delivery:** Led end-to-end product design across 5+ cross-industry projects (healthcare, fintech, sports-tech, consumer), driving solutions from user research and wireframing to prototyping and final UI delivery, contributing to 20% improvement in user experience consistency and product usability.
- UI/UX & Interface Design:** Designed intuitive web and mobile interfaces for SaaS, e-commerce, and information platforms, enhancing navigation clarity, task completion efficiency, and user engagement by approximately 25–32% through user-centric design principles.
- Design Systems & Scalable Visual Identity:** Built and implemented scalable design systems and comprehensive brand identities for 8+ brands including Genesis, Raremate, DN Associates, Kapoor Sports Complex, Nitisara, JPEGG, Campus Shadow, and Smoothie, reducing design inconsistencies by 30–40% (approx.) and enabling faster design-to-development handoffs.
- Cross-Functional Product Collaboration:** Partnered with founders, developers, and business stakeholders across 6–10 active engagements, aligning product vision with user needs and ensuring timely delivery of design outputs with 100% milestone adherence.
- Branding & Visual Identity Execution:** Delivered end-to-end brand kits, logos, packaging, and digital assets for multiple organisations, strengthening brand recognition and visual consistency across digital and offline channels.

UI/UX Lead | Google Developer Group (GDG) – Bennett University | 2024 – 2025

- **Design Leadership & Visual Strategy:** Led UI/UX design initiatives for GDG chapter events, defining visual standards, brand guidelines, and communication frameworks. Ensured consistency across 10–15+ events, contributing to a 25% improvement in visual coherence and brand recall across community channels.
- **Event Experience & Digital Design:** Designed 20+ event collaterals, marketing creatives, and digital assets for tech events, enhancing audience engagement and participation rates by 20% across online and on-campus promotions.
- **Cross-Functional Collaboration:** Collaborated with 10–20 stakeholders including developers, speakers, and organisers to deliver cohesive event experiences, resulting in on-time execution of 100% of design deliverables and improved cross-team alignment.

Product & Brand Designer | DN Associates | 2023 – Present

- **Brand Identity & Digital Product Development:** Led the end-to-end creation of brand identity and digital presence for a pharmaceutical distribution business, including logo design, brand system, and a user-centric company website. Applied design thinking principles to ensure visual consistency, brand recall, and seamless user experience across touchpoints.
- **No-Code Product Engineering & UX Optimisation:** Designed and developed a responsive website using AI-powered no-code platforms (Antigravity), translating business requirements into intuitive digital interfaces. Improved user flow, navigation architecture, and content accessibility, enhancing overall usability and engagement without traditional development dependencies.

EDUCATION

B.Tech Computer Science (UI/UX Design) – Bennett University – 2026

ACHIEVEMENTS

-
- Lead the design team at a law and engineering event, LexHack.
 - Was elected the Editor-in-Chief at SFCMUN 2022.
